Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35

U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 2-10, 12-18, 23-27, 29-32, 34-36, 38, 39, 41-48, 50-52, and 54-55 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Specifically pertaining to independent claim 2, the relationship between the bus events (line 8), packets (line 11), and bus device packets (lines 12-13) is clearly defined neither in the claim nor in the specification. It is unclear where the bus events are captured and encapsulated into network protocols (lines 8-9), how the bus events are decapsulated and recreated after they have been encapsulated into a network protocols (line 10), and where the bus events are decapsulated and recreated (line 10).
